**daratumumab PATIENTS: Provide this card to
healthcare providers BEFORE blood transfusion**

Patient ID Card for DARATUMUMAB

Name: _____

I am taking the following medication:

daratumumab antibody product for the treatment
of multiple myeloma

Dear Healthcare Provider,

Indirect Coombs test (Indirect antiglobulin test [IAT]) may show positive results in patients taking daratumumab, even in the absence of antibodies to minor blood antigens in the patient's serum. The determination of a patient's ABO and Rh blood type are not impacted. If an emergency transfusion is required, non-cross-matched, ABO/RHD-compatible RBCs can be given per local blood bank practices. use this reference as a source of additional information:
