IMPORTANT SAFETY INFORMATION

Infections

Before treatment with Remicade

- Tell your doctor if you have an infection even if it is a very minor one
- It is very important that you tell your doctor if you have ever had TB, or if you have been in close contact with someone who has had TB. Your doctor will test you to see if you have TB. Ask your doctor to record the type and date of your last screening(s) for TB on the card

- Tell your doctor if you have hepatitis B or if you know or suspect you are a carrier of the hepatitis B virus

During treatment with Remicade

- Tell your doctor straight away if you have signs of an infection. Signs include a fever, feeling tired, (persistent) cough, shortness of breath, weight loss, night sweats, diarrhoea, wounds, dental problems, burning when urinating or 'flu-like' signs

Heart failure

Before treatment with Remicade

- Tell your doctor if you have any heart problems such as mild heart failure

During treatment with Remicade

- Tell your doctor straight away if you notice signs of a heart problem. Signs include shortness of breath, swelling of the feet or changes in your heartbeat

Any suspected adverse events should be reported to the national spontaneous reporting system according to the national regulations.
